

SimplifiAI

Why Managed AI Automation Costs Less as You Scale

The problem with most automation platforms: they charge you more every time your business grows. More leads, more workflows, more AI usage means higher monthly bills. SimplifiAI is built to keep automation costs predictable as you scale.

Automation Platform Cost Comparison

Platform	Pricing Model	SMB Monthly Cost	Scaled Cost	Key Limitation
Zapier	Per task / execution	\$69–\$399	\$1,500–\$3,000+	Costs rise with every action
Make	Per operation	\$29–\$299	\$800–\$2,000+	Complex workflows consume ops quickly
Langflow	Infrastructure + LLM usage	\$100–\$500+	\$1,200+	Not designed for operational automation
SimplifiAI (Hosted Flat)	Managed service	\$497–\$997	Same price	No scaling penalty

Real-World Scaling Example

A growing business running 50+ workflows — including AI inbox routing, voice scheduling, CRM updates, and reporting — often pays thousands per month on task-based platforms. With SimplifiAI, the monthly cost stays flat.

SimplifiAI Managed Services:

- One-time setup: \$3,000 – \$7,500
- Monthly managed service: \$497 – \$997
- Hosting, monitoring, backups, and optimization included

Your automation costs do not increase just because your business is succeeding.

What's Included with SimplifiAI

- Enterprise-grade n8n hosting
- Monitoring, alerts, and automated backups
- 2–4 hours per month of optimization
- Workflow improvements and break/fix support
- Transparent, pass-through AI and voice usage costs

Bottom line: Traditional automation tools tax your growth. SymplifiAI makes automation a fixed operating cost instead of a penalty for scaling.
